

PREFACE

The **2016 ECOLOGICAL PROFILE of Calapan City** serves as a tool for researchers and planners in envisioning development planning and decision making. This will likewise aid the local government unit in determining the current level of services to its constituents and the resources available and environmental factors which will be the precursor for policy formulation process.

The Ecological Profile is divided into six (6) sectors:

1. Environmental Management Sector;
2. Demographic Sector;
3. Social Sector;
4. Physical (Infrastructure & Utilities) Sector;
5. Economic Sector;
6. Development and Management Sector.

May this profile also provide as a guide for everyone in our effort to pursue sustainable and developmental governance in the City of Calapan.
